## SCULPTURE IN THE CITY

---

**Musicity x Sculpture in the City** allows visitors to experience architecture-inspired music and sound art in the very place that sparked its creation.

The programme was launched in 2018 adding to the digital transformation of Sculpture in the City by enlivening ten sites from Aldgate to Shoreditch and from Leadenhall Market to St Botolph's-without-Bishopsgate and featuring ten newly commissioned tracks, ranging from modern classical and electronic to globally inspired soundscapes.

A new track by Mixmaster Morris will be launching to coincide with Nocturnal Creatures on 20th July at 70 St Mary Axe, one of the new sites of this year's exhibition and a new City public space.

These tracks are available 24/7 simply by using headphones and your mobile device. Listen to the tracks and find out more on:
